

Instruction for making planet booklet

This book has been designed to be printed out double sided, but you can make two separate booklets, one of the rock planets and one of the gas planets.

For the double sided booklet, Select page 2,3 and print double sided.

Fold the paper in half horizontally, so Mercury is in the lower right corner.

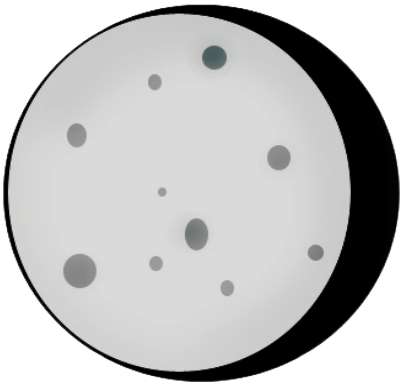

Fold the paper in half again, but vertically, so Mercury is on the front page.

You should now have a booklet of the four rock planets, now you can start some research to complete the booklet. If you want to do the gas planets, unfold the booklet again and turn it around and refold so that Jupiter is on your front page.

It has.....moons.
It is theplanet in
our Solar System.
Mercury is made of

Mercury

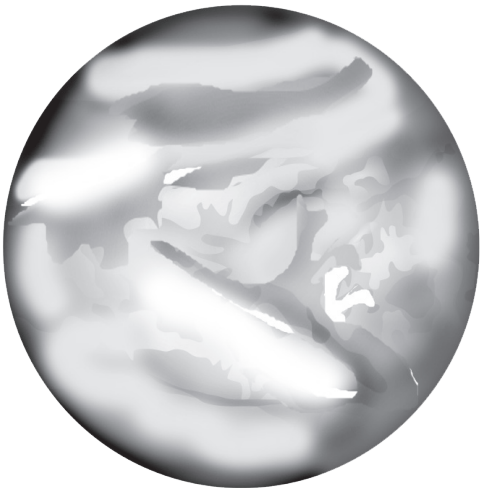

My Planets Booklet

It hasmoons.
